

With our beginnings as an innovative insurance co-operative started by timber growers, our roots are firmly planted in the farming sector. We understand our farmers, not only their needs, but also the challenges that arise when operating in this highly specialised environment. Our vast experience allows us to offer very specific insurance solutions to the farming community. From short-term domestic and commercial to specialist crop policies, we have the cover you need.

Our Farming Policy is a combined policy, and offers the convenience to insure domestic and farming assets on the same policy.

The policy offers insurance protection under the following sections of cover:
